

Blames Former Government For Railway Fiasco

A. A. MCGILLIVRAY TELLS NORTHERN AUDIENCE THAT FORMER LIBERAL GOVERNMENT PAID FOR BUILDING 369 MILES OF RAILWAY AND ONLY 254 MILES WERE BUILT.

Addressing a meeting in the northern part of the province this week, A. A. McGillivray, leader of the Conservative party in this province, gave out some valuable information in connection with the railway problem of this province during the early years of the Liberal administration.

gave a rapid-fire review of the financial gymnastics that led Alberta into its present unenviable financial position.

turned down with its modest request for a guarantee of \$12,000 a mile for 250 miles of railway, while Clark of Kansas City, three years later, was guaranteed 350 miles of line at \$20,000 a mile. He told them of the responsibility commission that could not find out anything, recounted how J. D. McAdams took over where Clark left off and spoke of Clark's suddenly dropping proceedings started by him in the United States and his subsequent statement to a Kansas City newspaper that he had received \$1,000,000 to stay away.

He went on to speak of the \$500,000 paid for the line from Spirit K. to Pous Coupe, a railway never built, of the purchase by the old line

"And now," he said, they try to hide this record failure and corruption under a new leader—one who declares in the same breath he was a Liberal and was a contender for the leadership of teh party."

"Let us stop fooling ourselves about that railway," he declared. "Let us get a real valuation—of our loss. We have been stuck to the governments of the past, let us write the loss off our books like *amortization* of business men. Then, when we find out what it is really worth, let it be turned over to one of the two great

In 1921, disgusted with years of Liberal mismanagement, said Mr. M. Gillivray, Conservatives in the province had played no small part in putting the U.F.A. government in power. It was fair now to examine the

good," he said, "put them back to work, but if they have failed, surely we can ask you to stand shoulder to shoulder with us."

He then went on to speak of the formidable failures of the U.F., of government-redistribution, northern railways, natural resources and finance. Mr. McGillivray's statements that the Conservative party's policy of redistribution was that of a radical rearrangement, undertaken by a non-political committee, on the basis of the recommendations of a select committee of the legislature, greeted with applause.

"The personal equation matters not at all," he said. "If you are honest and conscientious you will vote for that party which will best serve and extricate this province from the appalling financial situation in which

THE VOTERS' LIST

MRS. Baker, Returning Officer for this constituency, was in town yesterday and appointed A. E. Smith as enumerator to compile the Voters' List which will be used for the election this month. In order to be able to vote one of the requirements is that your name be on the Voters' List. All desirous of voting should, therefore, call on Mr. Smith and make sure that their names are on this list. Don't take it for granted that because it was on once before it will be on again.

Those who are entitled to vote and be on the Voters' List are British subjects of the full age of twenty-one years, who have been a year in Alberta and two months in this constituency and applies to both male and female. Be sure to get your name on the list.

THE BALLOT

AS the provincial general election which takes place on the 25th of this month, will run on the proportional representation plan, and as this will be the first time this plan has been used here, it would be well if all voters would give the matter some thought before election day so as not to run the risk of spoiling their ballots on election day.

There are three candidates in the contest in this constituency: J. J. Hendrick, representing the Conservatives; Jas. Holt, representing Labor and C. S. Pingle, representing the Liberals. In the past it has been the law to mark a plain X opposite the name of the candidate for whom the voter wanted to vote. The voting on the 25th of this month will be entirely different. On that occasion ballots will be marked first, second and third choice. For instance the figure 1 will be marked opposite the name of the man you would rather see elected; the figure 2 opposite the name of your second choice and the figure 3 opposite the name of your third choice.

Some appear to be of the opinion that it is policy and in the interests of their favorite candidate to vote for just their first choice. This is a mistake. The whole ticket should be marked out. Otherwise the vote has no choice in the selection of a representative should the favorite be defeated in the first count. Surely every voter should have a preference for one of the other two after marking one for his favorite.

The Liberals and the Labor party in Calgary must be very hard up for men to accept nominations for their respective parties in the present provincial campaign when the former has to select the Mayor and the latter an Alderman, and force them to fill dual positions. One would think that in a city the size of Calgary, it would not be necessary to lead up two men with all the important positions.

In this glorious country any boy can fight his way upward to success unless his father leaves him too much spending money.

There's one good thing about a cold. You don't have to take all the advice your friends give.

A WRONG IMPRESSION

IN last evening's Medicine Hat News, a news item appears under the following big two column heading: "Tory Senate Threw Out Old Age Pensions." The news article under this heading says Sir Allen Aylesworth, Senator J. J. Hughes, and Senator Turfitt, all Liberals, voted against the bill and that Senator Robertson, Conservative, supported it. Why, then, does the News say that the Tory Senate threw out the bill? When it is remembered that the Conservatives have a substantial majority in the Senate and when it is a well known fact, that seldom, if ever, are all the Senators present at any one time, it is only reasonable to assume that the percentage of Liberals who opposed the bill would be about as large as the percentage of Conservatives. The heading on this article in the News is just in keeping with everything of a political nature appearing in that paper.

The Medicine Hat News is about the only daily paper in this province which never did show any inclination to be fair with all parties in things political. When it is remembered that Medicine Hat is a one-party town, and that the News gets its support from Liberals, Conservatives and Farmers alike, its attitude in things political is very fair example of those who stand the fountain which gives them drink.

The heading over the article with which reference is made gives an entirely wrong impression, and that is just exactly what it was intended to do.

Here and There

The maple sugaring industry is on the up-grade again. The yearly sugar production with its equivalent in syrup decreased from 23,000,000 pounds in the '20s to 20,000,000 pounds a few seasons ago. For 1935 production is equal to 25,512,359 pounds of sugar.

After one of the mildest winters in the known history of the Rocky Mountains, the Banff tourist season was subdued in during the first week in April, when a distinguished group of Australian, under Sir Frank Hodge, of Melbourne, took the general drive through the surrounding mountains.

On the last leg of the 129-day Round-the-World Cruise, the Canadian Pacific Line "Empress of Scotland" passed the Panama Canal, and Miss Katherine Kinney, a passenger, was elected to operate the controls of the two Miraflores locks. In doing this the proud leader sailed the vessel fifty-four feet. A tall of \$17,121.15 was paid to clear the vessel at the canal.

Sir John Pickford, Chief Scout Commissioner and Commissioner for Overseas Scouts and Migration, recently laid before E. W. Beatty, President of the C.P.R., his plans for assisting boys over seventeen years of age to come to Canada. John said that more British boys were going to Australia because the age limit for assisted passage to that country was higher than Canada's.

Increasing prosperity in the agricultural industry, resulting in re-awakened interest in the acquisition of Canadian farm lands, has had the result of raising the average value of western farm lands from \$27.87 per acre in 1924 to \$38 per acre in 1935. For the year 1935 Prime Edward Island shows the highest increase at \$44 per acre, compared to \$40 in 1934.

Of the grain stocks at the port of Vancouver, which are being steadily increased, European markets received practically 20 million bushels of the Orient 25 million bushels of the 47,640,647 bushels of the 1935 crop, which had been shipped to Vancouver. The amount of grain in store at Vancouver is seldom more than 4,500,000 bushels.

All local trains coming into Windsor Station, Montreal, from the eastern terminals brought supplies of maple syrup which increased rapidly during April. Similar shipments posted into the Place Voyer Station from the Lacrosse, Dominion Express officials stated that the quantities were well up to the average of former years, while the quality was also up to the mark.

With the inauguration of the new "Redcliff" special train service on the Canadian Pacific Railway line between Boston and Montreal, a group of prominent Bostonians were invited to Montreal on the initial trip of the "Redcliff" from Boston. Enthusiasm went to Boston on the same special. The "Redcliff" took several hours off the old schedule between the two cities.

According to the weekly crop report of the Canadian Pacific Railway for the spring opening of the 1936 season, after one of the finest winters ever experienced in Western Canada, finds conditions very favorable. Feed was plentiful and winter losses less than usual. Prospects for coming season are fine owing to good moisture. There is a live demand for new machinery.

Reasons Why the U.F.A. Government Should be Returned

The main concern of the Province is that administration. Public Health, Maintenance of Law and Order, Transportation, Education, Industrial and Agricultural Welfare, are among the principal functions of the Government of Alberta.

Administration and legislation can be best handled by a non-party government.

The U. F. A. system of Government is one of Co-operation with other representatives in the interest of the Province. The party system is one of opposition.

The party system is organized from the top down, the U. F. A. system is organized from the bottom up. Under the U. F. A. system the power is with the people. It is not contended that the new system is perfect, but it is a big step in advance.

The political parties in Alberta are subject to dictation from their respective headquarters in Ottawa. The U. F. A. representatives are responsible only to the people of Alberta. Recent events have proved the necessity of having a Government in Alberta not subject to outside dictation.

All over the world the party system is breaking down.

The Alberta Government is not a class Government. It has always been prepared to co-operate with representatives of all interests elected to the Legislature.

Your only choice in this election is between the U. F. A. system of Democratic Government and the party system. There is no alternative.

"In the wake of the party system had followed corruption."—J. T. Shaw, Nov. 1921.

WORK AND VOTE FOR U.F.A. CANDIDATES. — JOIN THE U.F.A.

This space is paid for by the membership of the U. F. A., for the information of the electors.

Issued by the U. F. A. Publicity Committee, Calgary

Capt. J. T. Shaw's MANIFESTO

1. Immediate examination of our provincial taxation system and adjustment on sound principles of taxing powers between the province and the municipalities.
2. Decentralization as far as practicable in the services of government, so as to secure more efficient service at less cost.
3. An immediate and long overdue reduction in taxation with special tax adjustments for sub-urban areas not suitable to intensive production.
4. A serious and determined effort to make expenditure balance income every year, not every pre-election year only, as at present.
5. The budgeting of an adequate sum every year, on the sinking fund principle to effect the retirement of our public debt within a reasonable time.
6. Realizing the primary importance of the agricultural industry, the Liberal party pledges itself to assist that industry in every reasonable way, by ensuring that co-operative marketing enterprises get a square deal, secure from unfair competition and from all partisan influence and all discrimination; by the provision of adequate facilities for marketing the farmers' produce, by establishing in close co-operation with Dominion government, a system of rural credits based on sound principles by vigorous demand before the Railway Commission for needed reductions in railway and express rates and for the elimination of discriminatory freight rates; and by jealously guarding the farmers' interests in the western route, not only by zealous watching but also by proper representation.
7. The Liberal party undertakes to inspire a real leadership in educational affairs and will be prepared to make more liberal financial provision for that essential service. Also will use every endeavor to have the federal government not only increase its grants for technical education. In addition there must be a closer co-ordination of the agricultural work undertaken by the university and agricultural and other schools in the province.
8. The Liberal party pledges itself to encourage an expansion in the hospital and nursing service of the province in order to promote the highest standard of public health.
9. The Liberal party has assisted in every possible way to secure the return to the province of its natural resources. This should soon be realized. If honored with public confidence, the Liberal party proposes to undertake the prompt and efficient development of these resources in the public interest along sound business lines.
10. When entrusted with office the Liberal party will engage a small body of experts to examine the sources of power in the province for the purpose of evolving if possible a practical power scheme to supply cheap power to our communities for industrial and agricultural purposes.
11. The Liberal party offers a redistribution according to a definite plan on the principle of representation by population, paying however, due regard to the more sparsely settled portions, geographical area and community of interest; it being understood that such redistribution will substantially reduce the number of provincial ridings.
12. The Liberal party proposes to encourage a policy of co-operative effort of all classes and their representatives in the interests of democratic legislation.
13. The Liberal party strongly favors and approves of a co-operative effort between the Dominion and Provincial governments for the purpose of securing old pensions. The plan which has received second reading in the House of Commons is approved.
14. The Liberal party is responsible for every advance made in securing to women a larger measure of equality in political and economic matters. That policy must be continued until in every practicable way, women enjoy the fullest equality with men.
15. The Liberal party offers to the electors a policy of constructive effort and of action, and a government of the people, by all the people and for all the people.

WORLD HAPPENINGS BRIEFLY TOLD

Married couple, travelling alone to Cuba will have to show authorization from their husbands before they can secure admission.

A reduction in the price of automobile tires is announced for Great Britain. The reduction amounts to an average of ten per cent, and has become effective.

About the only place in the world where the birth rate has been increasing much lately is the South Sea Islands, the League of Nations has determined.

"Jitter" is the name London has deflected for the new two-dollar tobacco, which is to circulate in London streets in an effort to combat high prices charged by taxicabs which cost four passengers.

Large shipments of Australian butter which have been arriving in Canada recently via the United States are responsible for the recent reduction in the price of butter in some parts of the Dominion. It is stated.

The new Mexican immigration law has been published in those official, thereby becoming effective. The law requires that on all incoming aliens and registration of all aliens in London, the entrance of aliens pending a criminal record in Mexico which may be applied to ministers of the gospel.

Their legislation appears to be a conference with representatives of all provincial governments before any steps are taken in this matter.

Miner's Unimpaired for Burns

Remarkable increase in demand for Canadian wheat is reflected in the regular statistical report of the Vancouver Merchants' Exchange. To the end of February the United took 16,097,758 bushels, as against 2,512,445 bushels in 1924, and 2,658,266 bushels in 1925. This increase is due to growing favor of Canadian hard wheat and to the fact that prices were right this season.

She Couldn't Sleep Her Was So Bad

Mrs. J. D. McClelland, Charlotte, N.C., writes:—"About a year ago I was greatly troubled by sleeplessness. I couldn't sleep at night, and was so nervous I imagined that I could see everything in the room moving, and would have to turn on the light before I could get to sleep."

I took several boxes of them, and now get a full night's sleep with no trouble, and feel fine as ever."

Failure Of One-Crop System

Attention Now Being Given to the Growing of Legumes

(By Jax, Jr. McNeary, Gloucester's Stock Farm, Brandon, Manitoba)
Western Canada, in the past has been a small grain growing country. The climate, soil and all other conditions have combined here to justify One-Crop grain fields to the exclusion of other lines of farming. However, on land that has been farmed from 15 to 25 years, the production has decreased from various causes, until the profits in strictly grain farming are no longer certain.

All one-crop or grain farmers realize sooner or later that the fundamental principle of farming is being over-exploited, that the decrease in yields and the difficulty with weeds, plant diseases and other pests, is due to the one-crop system, which depletes the available fertility of the soil, and does not provide for saving or increasing soil fertility, or for maintaining weeds and other pests. Hence, the great interest being taken in livestock, corn, alfalfa and clover is not for these things alone, but because they will be the means by which the profitable and abundant production of small grains may be maintained.

The one-crop system is not peculiar to Western Canada as all new countries have been similarly treated. That is, grain, and which gave the best cash return. When this crop has been raised for a number of years, the depletion of soil fertility, attention has been given to the growing of legumes, the raising of livestock and perhaps to the use of some commercial fertilizer.

"Legume" is the name of a class of plants of which alfalfa, clover, vetch, add other clover, beans, peas, etc., are members. The seed is borne in the form of a pod, and the leaves of plants differ from all others in that they provide a means of obtaining nitrogen from the air. Nitrogen is the most expensive element when brought in commercial fertilizer. It is also the most abundant element in nature, more than half the air is nitrogen. Hence, clover, alfalfa, etc.—legumes—are utilized for the purpose of restoring this element of soil fertility. Young livestock, and particularly milk cows, must have nitrogen in their feed, for no growth or milk can be made without nitrogen.

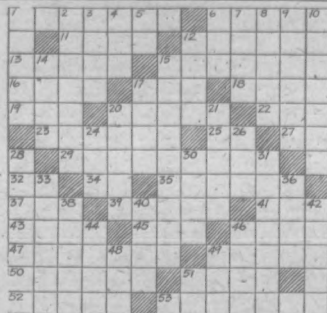

All plants use nitrogen, but the grain, grasses, corn, etc., must rely on the small available store in the soil, while the legumes can draw on the unlimited stores in the air. For this reason, the hay and seed from legumes are much richer in nitrogen than that from the grains and grasses. Legumes obtain this atmospheric nitrogen by the aid of bacteria which live in tubercles on their roots. Unless these bacteria are present, the legume would be unable to utilize the atmospheric nitrogen at any other plant. When the bacteria are not present, or for any reason will not grow on the roots, the legume will not produce satisfactorily because it is natural for these plants to obtain a part of their nitrogen from the air. Artificial inoculation, taking the soil, may be employed to advantage, especially on poorer soils.

Persons of the old farming regions realize to every known means of saving plant food and returning it to the soil. Here is the new country, when land is worked out, we have moved on west or north, to new land, or cleared the timber from new land.

The greatest desire of the farmer is his soil fertility. Like humans, this fertility may either be used over and over again, or it can be depleted and wasted in a few years. When fields are below the cost of production, or below what they formerly were. It is evident that there is need for obtaining this situation. Rotation of crops aids in controlling weeds, plant diseases and insect pests, and also enables the farmer to feed livestock and return a part of the fertility to the soil in the shape of barnyard manure.

Path enables a man to eat hash.

CHRISTIE COMEDY
"DANCING DADDY"

Mr. and Mrs. G. H. Werts and family recently returned to Leithridge yesterday to witness the Ux. football game.

H. J. Staines is representing the local amateur league at the annual League meeting in about two weeks.

Mrs. W. Crook and Mrs. H. Crook of around again and were out in town visiting with Mrs. and Mr. Henderson.

There will be a dance in the Cameo theatre tomorrow, (Friday) evening. Every music and a good time is assured.

A. C. Bone, Imperial Bank Inspector, was in town this week inspecting, not branch here, and looking over the prize baby.

H. Champ accompanied by Wm. Champ, W. Smith and E. Marshall, returned to Leithridge to take in the big football game there.

W. C. Smith, M.D.A., will address a meeting at Box Springs at 8 o'clock tomorrow afternoon, and at Leithridge at 8 o'clock in the evening.

Mr. and Mrs. John Wilson, of Mount Jew, spent a few days in town this week the guests of Mr. and Mrs. A. N. Colard.

Mr. H. H. Hough and children, of Macleod, are spending this week in town visiting their uncle, Mr. J. H. Hough.

Mr. McMillan, the Conservative candidate in the Empire constituency was in town today on his way through to his constituency. He reports prospects most promising for his election.

A committee of officers from the local R.O.E. Lodge accompanied the band and all went to Leithridge today. They report a most enjoyable trip.

Mr. John Jackson, a former resident of Redcliff, but now of Seattle is visiting his sister, Mrs. Short, in Medicine. Mrs. Jackson was in town yesterday returning after a successful business trip.

Mrs. A. E. Smith, who has been in the Medicine Hat hospital for several weeks was sufficiently recovered to return home last Thursday. Although still confined to her bed she is progressing favorably.

Redcliff will be well represented at the football game in Calgary next Saturday when the Old Country team plays. Among those who are going up by train are A.J. Learmonth, R.E. Hodges, D. Kerr, F. Broughton, Jim Learmonth, Bert Allison, and A. H. Dalrymple.

The Dominion Greenhouse here is harvesting one of the first crops of tomatoes just now, that it has ever had since starting business. The tomatoes are of an exceptionally good quality and are being sold abundantly. Mr. Mansfield is shipping to all parts of the province and is having no trouble in disposing of his exceptional crop.

NEW BARBER SHOP FOR REDCLIFF

I have decided to open up a Barber Shop in the stand on Broadway, just opposite the Post Office, where I will do all kinds of hairdressing in the evenings of every day

from 6:30 to 11 o'clock and later if necessary on Saturdays.

CAMEO THEATRE

Mr. H. Sheehy and family left last week for British Columbia where they will visit friends for a few weeks.

I wish to take this opportunity of expressing my sincere thanks and appreciation to the Great War Veterans of the people of Redcliff and the surrounding districts, who so kindly and willingly supported me in the popularity contest. Redcliff deserves praise and credit for her votes and influence. I thank you.

VIVA ANNA COX.

MILLER—in Redcliff, on Wednesday June 9th, 1926, to Mr. and Mrs. Dave Miller, a son.

Here and There

On May 16 two hundred new Scottish settlers arrived on the Canadian Pacific line "Belgians" in charge of Father R. A. Macdonald, managing director of the Scottish Immigration Aid Society. This is the second contingent of settlers brought out this year under the Chas Donald plan.

The well-known comic strip artist, Clare Briggs, of "Mr. and Mrs." fame, arrived in Montreal recently with six New York newspaper men. They then went up to the Laurentian mountains for some trout fishing on Lake Archambault and returned to the immediate vicinity of St. Denis Chate.

A. L. Rawlinson, passenger agent, and Victor Colligan, chief clerk of the Canadian Pacific Railway at Antwerp, have been appointed as Officers of the Order of the Rose of Sharon by His Majesty, King of Belgium, for services rendered in connection with the general handling of humanitarian passengers at the port of Antwerp.

An innovation is now in use along the Laurentian run of the Canadian Pacific Railway in the form of two hospital cars which will meet any demand which arises or urgent calls that may occur in cases of illness. First-class cars have been converted into hospital rooms in such a way as to easily take care of four or five patients.

A single shipment of ten motorcycles, consisting of 85 from Army, Mass, recently arrived in Tokyo, having come forward by Canadian Pacific rail and "amer. lines. The demand for motorcycles in Japan is steadily increasing and it is considered a cheap and convenient method of locomotion. I will enter in the somewhat narrow bounds of the country.

SPECIALY CONDUCTED TOURS TO GREAT BRITAIN AND THE CONTINENT

Some Extracts From Speeches Made by

A. A. McGillivray

Leader of the Conservative Party

THE FARMERS' PARTY

It will be said that the farmers in Alberta should vote for this government because it is a Farmers' Party.

The Conservative Party has never existed, and does not now deny, the right in this predominantly agricultural province to have farmers dominate in our Legislature and the fact is that an examination of the list of Conservative Candidates in the field will go to show that by far the greatest percentage of those candidates is farmers actively engaged in farming in this province.

Can it be said then that a farmer is any less a farmer, any less concerned with or any less apt to guard farming interests because he sits beside the lawyer McGillivray instead of beside the lawyer Brownlee?

REDISTRIBUTION

The Provincial Conservative Party stands four-square for a substantial reduction in the number of members in the Legislature of the Province and I may add that in my personal opinion there should not be more than forty-five members in the Legislature and, taking that number, or some such approximate number, as a basis, an independent non-political commission should be created to prepare a draft division of the Province into just and equitable basis, having regard both to population and territorial area without regard to political advantage for any Party, such commission to submit its report to the Legislature to be dealt with as that body might think fit, because in the last analysis the Government must take responsibility for redistribution, but in this way the legislative body starts out with a draft bill which is non-political in character and which is not subject to the usual political maneuvering.

Contrast this definite statement with the failure of the group government to fulfill its promises, and the vague reference to this matter by the Liberal leader.

CAMPAIGN FUNDS

The Provincial Conservative Party presents the unusual spectacle of a political party entirely without funds. The present Government has, through a medium of taxation of U. F. A. members, who are willing to submit to the yoke of the political machine, given a very considerable amount of money with which to run its campaign. No one need be told in this country that the Provincial Liberal Party has never lacked funds in its political efforts.

The Provincial Conservative Party, on the other hand, represents the voluntary effort of the thinking men and women of the Province, who are willing to spend their individual time and their individual money to bring order out of chaos and put into office a Government, from which Government it may be confidently expected there will not only be economy but a stemming of the flood of debt that is about to engulf us.

There never has been a party, and that includes Liberals and former supporters of this government quite as much as it does former Conservatives, which has made so great a political endeavor without the slightest financial backing from any source.

It has ever been tried before, that there shall at least be one balance in political history where a Party has appealed to the people of the country on grounds of public policy without paid agents, without paid organizers and without one single cent in its treasury.

REDUCTION IN SESSIONAL INDEMNITIES

At this time, when the Province is burdened with an enormous load of debt and when private individuals everywhere are forced to economize, the Government should set an example of economy and retrenchment by bringing down a bill for a reduction to the extent of \$500 each in the sessional indemnities of the members of the Legislature and this reduction could be effected without the members suffering by having a shorter session of the Legislature, which could easily be accomplished once we get away from a shuffling and inefficient Government which spends most of the great length of time that it is in session from year to year in amending laws already passed and passing new ones without consideration and regardless of consequences, resulting in further amendments, repeals and additions the following year. This continuous change in our laws, not only involves the lengthy sessions alluded to, but has the more serious effect of making uncertain the laws which govern the commercial world within the boundaries of the Province.

VOTE FOR J. J. HENDRICK

And Strengthen Mr. McGillivray's Hands in Giving This Province a Real Business Administration
